Outcome measures in palliative care: Using the POS family of measures

One/two day training 5-6 February 2015, London

These workshops are aimed at all professionals working in palliative and end-of-life care. The workshops will equip you with all the necessary skills and knowledge, and extend your current knowledge and skills if you are already using POS/outcome measures. It is facilitated by experts at the Cicely Saunders Institute including Professor Irene Higginson.

Dear Colleague,

The Palliative care Outcome Scale (POS) is a validated outcome measure, which is widely used in palliative care across Europe, Australia, Asia and America. POS is free to use and available at www.pos-pal.org.

The POS workshops will combine theory and hands-on exercises. During the workshops you will have the opportunity to share issues relevant to your organisation and practice as well as learning from other participants experiences and challenges. A full programme is available at www.pos-pal.org/training.

The workshops are facilitated by leading experts including Professor Irene Higginson, Professor Claudia Bausewein, Dr Richard Harding and Dr Fliss Murtagh.

Participants can choose to attend one or two days depending on their interest or level of involvement. For more information or to register visit www.pos-pal.org/training, or contact us: csi.events@kcl.ac.uk, +44 (0) 20 7848 5578.

Register before the 30th January 2015 as places are limited.

Looking forward to learning with you,

Prof. Irene Higginson, Dr Fliss Murtagh, Dr Richard Harding & Prof. Claudia Basewein
